PIMCO Total Return Fund II

FUND DESCRIPTION

The Total Return Fund II is a diversified portfolio of high-quality bonds that is actively managed to maximize return in a risk-controlled framework.

INVESTOR BENEFITS

This Fund offers investors an actively managed core bond portfolio that can capitalize on opportunities within multiple sectors of the U.S. fixed-income market.

Potential benefits of this Fund include:

- Attractive excess return potential in a risk-controlled framework
- Portfolio diversification, income and capital gains potential through active management
- An investment strategy managed for all market environments, emphasizing both top-down macroeconomic analysis and bottom-up issue selection

THE FUND ADVANTAGE

As a pioneer in fixed-income total return investing, the Fund takes a diversified approach to adding value in its effort to provide consistent performance by employing multiple concurrent strategies and taking modest risk in each, thereby reducing the risk of poor performance arising from any single source. PIMCO has a substantial and experienced team specializing in all sectors of the global bond market, and a record of actively pursuing an extensive global fixed-income opportunity set and identifying innovative solutions in our effort to maximize returns.

VALUE OF CORE STRATEGIES

An allocation to PIMCO fixed-income strategies may be beneficial as a core part of a balanced portfolio. Bonds can provide a steady source of income and, as part of a total-return strategy, potentially produce capital gains as well. An allocation to a PIMCO fixed-income strategy in a portfolio also can offer diversification and serve as a hedge against volatility and risks in other asset classes, particularly in times of economic uncertainty or deflation. Long-duration bonds can be used to diversify a broader core allocation to fixed income and help an overall portfolio's match to longer-term liabilities.

ABOUT THE BENCHMARK

Benchmark Duration (yrs) 4.47

The Lehman Brothers U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis.

ABOUT PIMCO

PIMCO, founded in 1971, is a global asset management firm serving a full range of institutional and retail investors worldwide. Our reputation as one of the world's top asset managers rests on our combination of a long-term investment approach, superior client servicing and cutting edge technology. With offices in nine countries in North America, Europe and Asia, we manage investments across a full spectrum of global financial markets. Our success is built on our ability to consistently provide attractive returns while maintaining a strong culture of risk management and long-term discipline.

Investors should consider the investment objectives, risks, charges and expenses of this fund carefully before investing. This and other information are contained in the fund's prospectus, which may be obtained by contacting your PIMCO representative. Please read the prospectus carefully before you invest or send money.

The total annual operating expense ratio excluding interest expense is 0.50%.

The performance figures presented reflect total return performance, changes in share price, and reinvestment of dividend and capital gain distributions. All periods longer than one year are annualized.

Tracking error measures the dispersion or volatility of excess returns relative to a benchmark. Information Ratio is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns.

Mortgage and asset-backed securities may be sensitive to changes in interest rates, subject to early repayment risk, and their value may fluctuate in response to the market's perception of issuer creditworthiness; while generally supported by some form of government or private guarantee there is no assurance that private guarantors will meet their obligations. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. Diversification does not ensure against loss.

The value of most bond funds and fixed income securities are impacted by changes in interest rates; bonds and bond funds with longer durations tend to be more sensitive and more volatile than securities with shorter durations.

Past rankings are no guarantee of future rankings. The Lipper Rankings are calculated by Lipper, Inc and are based on the total return performance, with distributions reinvested and operating expenses deducted. Rankings begin with the inception of the actual share class does not take into account sales charges.
