The performance data shown represents past performance, which does not guarantee future results. Investment return and principal value of an investment will fluctuate; therefore, you may have a gain or loss when you sell your shares. Current performance may be higher or lower than the performance stated. To learn more or to obtain the most recent month-end performance, call Fidelity or visit www.401k.com (log in, choose plan, select "Investment Choices & Research", and then pick investment option).

Total returns are historical and include change in share value and reinvestment of dividends and capital gains, if any. Cumulative total returns are reported as of the period indicated. Life of Fund figures are reported as of the inception date to the period indicated. These figures do not include the effect of sales charges, if any, as these charges are waived for contributions made through your company's employee benefit plans. If sales charges were included, returns would have been lower.

Indices are unmanaged and you cannot invest directly in an index.

The gross expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. For mutual funds, the values were drawn from their respective prospectuses.

The returns of funds with reimbursed expenses would be lower if their expenses had not been reimbursed.

The Morningstar Category Average is the average return for the peer group based on the returns of each individual fund within the group. It assumes reinvestment of dividends and capital gains, if any, and excludes sales charges.

Morningstar Category Average Gross Expense Ratio: This figure is calculated by Morningstar and represents the mean average of the gross expense ratio paid by each fund in the Morningstar category. Each share class of a fund is treated as a separate fund. Morningstar uses each fund's most current, publicly available prospectus at the time the average is calculated.

% Rank in Category is the fund's total-return percentile rank relative to all funds that have the same Morningstar Category. The highest (or most favorable) percentile rank is one and the lowest (or least favorable) percentile rank is 100. The top-performing fund in a category will always receive a rank of one. The number in parentheses represents the number of funds in the category. % Rank in Category is based on total returns, which include reinvested dividends and capital gains, if any, and exclude sales charges.

The Overall Morningstar Rating[™] for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics, calculated as of the date shown. Past performance is no guarantee of future results.

Please refer to Glossary of Terms for definitions of terms used in Portfolio Statistics and elsewhere.

* The benchmark shown in the performance section was used in calculating measures and ratios. If more than one benchmark is shown, the first (primary) benchmark was used.

Fidelity Diversified International Fund

GOAL and WHAT IT INVESTS IN are derived from the fund's prospectus.

GOAL: Seeks to provide capital growth.

WHAT IT INVESTS IN: Primarily invests in common stocks of foreign companies. Foreign investments, especially those in emerging markets, involve greater risk and may offer greater potential returns than U.S. investments. This risk includes political and economic uncertainties of foreign countries, as well as the risk of currency fluctuation. If you sell your shares after holding them for less than 30 days, the fund will deduct a short-term trading fee from your account equal to 1% of the value of the shares sold. Share price and return will vary.

The Morgan Stanley Capital International Europe, Australasia and Far East (MSCI EAFE) Index (net MA tax) is an unmanaged market capitalization-weighted index of equity securities of companies domiciled in various countries. The index is designed to represent performance of developed stock markets outside the United States and Canada and excludes certain market segments unavailable to U.S. based investors. The index returns for periods after 1/1/1997 are adjusted for tax withholding rates applicable to U.S.-based mutual funds organized as Massachusetts business trusts.

[‡]For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating (based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. Each share class is counted as a fraction of one fund within this scale and is rated separately, which may cause slight variations in the distribution percentages. If the fund has multiple share classes, the Morningstar Rating is for the share class specified only; other classes may have different performance characteristics.
